DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
2. Claim 1 recites the limitation "the other", "the exchanges", "the multiplexers", and "upon a request by one of them". There is insufficient antecedent basis for this limitation in the claim.
3. Claim 1 is also rejected as being vague and indefinite because it is unclear what is being requested, in the limitation "*a multiplexer encapsulated in the library and configured to multiplex the communications channel of a process P_i with the communications channels of the other processes P_1, P_2, \dots, P_N , the exchanges being made in the form of data flows, the communications channel between two processes P_i, P_k being activated by the multiplexers of the two processes, upon a request by one of them*".
4. Claims 2-11 are objected as being dependent upon a rejected base claim.

Response to Arguments

5. Applicant's arguments with respect to claims 1-11 have been considered but are moot in view of the new ground(s) of rejection.
